

World-Class Digital Entertainment and Control

Life|media® is a powerful Media Center server optimized for digital entertainment and home control. Engineered for premium performance, Life|media has the capacity, speed, and flexibility to meet your most demanding requirements.

Digital Entertainment

With Life|media, your entire music collection is available to be enjoyed in any room in your home. Pause live TV, watch high-definition video, or record up to four TV shows simultaneously. View your home videos or slideshows of your digital photos, watch DVDs, and enjoy online content.

Home Automation

Access Life|ware® to effortlessly adjust lighting, thermostats, and shades or monitor your live camera feeds and security systems. Enact Life|scenes™—such as Home, Goodbye, or Party Time—to automatically adjust your home's lighting, climate, audio, shades, and security systems to preset levels.

Life|media runs Windows® 7 and is powered by the latest Intel® processors. Life|media also supports CableCARD™ tuners and Blu-ray™, so you can take your high-definition entertainment options to the next level.

All models include a patent-pending rear-panel MediaPlate design that offers six different audio and video configurations.

Features

- Up to 2 Terabytes of storage to keep ALL your movies, music, and photographs
- A variety of TV tuner configurations (ATSC/QAM, standard cable, and CableCARD™)
